

KEY:

Top left: View of the chimney, looking southwest from above the tanks of the BFI.

Bottom left: Detail of the stokehole for the chimney's furnace

Top right: Photograph dating to c. 1901, showing the testing of the desalination plant shortly after its completion

Bottom right: map dated c. 1900, depicting the Eastern Telegraph Depot. As well as showing the various elements of the depot, the desalination chimney is also marked (labelled as condensing engine), as is the pipeline leading from the plant northeast towards Rupert's Hill.

Note also the magazine that once belonged to Rupert's Lines, now lost beneath the BFI fuel tanks
