REVISED EDITION OF THE LAWS, 2017

MARITIME & AVIATION LAW

**PORTS (HEALTH) ORDINANCE, 1905<sup>1</sup>**

*Ordinance 7 of 1905  
In force 1 January 1906*

*Amended by Ordinance 14 of 2017*

*Subsidiary legislation:  
**PORTS (HEALTH) REGULATIONS, 1932**  
*Legal Notices 1 of 1932, 1 of 1937 and 1 of 1938  
Amended by L.N. 1/1955, Ordinance 2 of 1967**

---

**PORTS (HEALTH) ORDINANCE, 1905**

ARRANGEMENT OF SECTIONS

1. Short title
2. Interpretation
3. Ships arriving from infected places to be placed under observation
4. Masters and others under observation subject to orders of competent officer
5. Signal to be hoisted on ship when placed under observation
6. Regulations

AN ORDINANCE for the prevention of disease in ports.

**Short title**

1. This Ordinance may be cited as the Ports (Health) Ordinance, 1905.

**Interpretation**

2. In this Ordinance, unless the context otherwise requires—  
“**Harbour Master**” means the person so appointed under the Ports Ordinance, 2016;  
“**Health Officer**” means any medical practitioner appointed or employed by the Governor to

---

<sup>1</sup> Under section 10 of the Revised Edition of the Laws Ordinance, 1999 this text is authoritative and is the sole authentic edition in respect of the law contained in it as at 1 November 2017.

act in the execution of this Ordinance, or authorised by the Governor to act for or assist a Health Officer;

“**master**” means the master, officer or other person for the time being in charge of any ship;

“**observation**” means isolation of passengers, either in a proper station provided for that purpose or on board ship, prior to their obtaining free pratique;

“**ship**” includes vessel, boat or other floating craft.

### **Ships arriving from infected places to be placed under observation**

**3.** All ships infected or otherwise liable to sanitary restrictions under the regulations made under this Ordinance; and all persons and things, whether coming or brought in such ships, or going or put on board the same either before or after the arrival of such ships are subject to -

- (a) observation in places and in a manner directed by the Governor; and
- (b) all the provisions of this Ordinance or any regulations made under it concerning sanitary measures.

### **Masters and others under observation subject to orders of competent officer**

**4.** (1) All masters of vessels and other persons who have been placed under observation by a competent officer by virtue of section 3, and all persons having had any intercourse or communication with them, are subject, in respect to such observation during the period they are detained in it, to any orders they receive from the Health Officer or Harbour Master or other competent officer acting for them.

(2) The officers mentioned in subsection (1) are authorised and required to enforce all due obedience to the orders there mentioned and, in case of necessity, to call in others to their assistance; and any person, who is liable to or is under observation, refusing or neglecting to obey or attempting to evade the performance of such orders commits an offence.

Penalty: A fine of £100.

### **Signal to be hoisted on ship when placed under observation**

- 5.** The master of any ship placed under observation must -
- (a) immediately hoist and keep hoisted at the foremast head a yellow flag; and
  - (b) remain outside the limits of the port of Jamestown, or if already in the port forthwith remove the vessel to the sanitary anchorage declared by regulations under this Ordinance.

### **Regulations**

- 6.** The Governor in Council may from time to time make regulations—
- (a) respecting port sanitary measures and all matters connected with them, and the loading and landing of goods or articles by vessels under observation;
  - (b) respecting the remuneration to be paid to the Health Guard by the master of a ship under observation;
  - (c) fixing the penalties for the breach of any regulation made under this Ordinance, not exceeding £100;
  - (d) respecting the destruction of rats or other animals on board ship;

(e) respecting ships of war.

---

33. Responsibility of Harbour Master
34. Visit of Harbour Master to observation stations
35. Exemption of H.M. ships
36. Penalty for non-compliance with regulations

**Citation and interpretation**

1. These Regulations may be cited as the Ports (Health) Regulations, 1932 and in

these regulations, unless the context otherwise requires—

“**healthy ship**” means a ship which, although having come from an infected place, has had on board no death from, nor any case of, infectious or contagious disease, either before leaving the port of departure, or during the voyage, or on arrival;

“**infected place**” means any place where any infectious or contagious disease exists: but a place is not to be regarded as an infected place only because of the existence there of imported cases of such disease or because of the occurrence of a single non-imported case;

“**infected ship**” means a ship on board of which a case or cases of infectious or contagious disease are present or have occurred within a period of 7 days previous to the date of the arrival of the ship, except in the case of smallpox, when the period is 12 days;

“**infectious or contagious disease**” means cholera, plague, yellow fever, typhus, diphtheria and smallpox, and any other disease the Governor in Council may from time to time proclaim;

“**observation**” means isolation of passengers, either in a proper station provided for that purpose or on board ship, prior to their obtaining free pratique;

“**place**” means any clearly defined portion of territory such as an island, a port, a district, a parish, a town or a village;

“**sanitary anchorage**” means the anchorage so declared by regulation 20;

“**sanitary station**” means the station so declared by regulation 20;

“**surveillance**” means that passengers are not isolated; they receive free pratique at once and are allowed to proceed to their place of destination (the proper authority of which must be informed of their arrival), there to undergo medical supervision;

“**suspected ship**” means a ship on board of which a case or cases of infectious or contagious disease have occurred during the voyage, or during the stay of such ship in the port of departure, but on board of which no fresh case has occurred within the period embraced by the incubation period of that disease.

### **Hours of pratique**

2. All ships arriving at St Helena will be granted pratique between the hours of 6.30 a.m. and 9.00 p.m. by the Health Officer or in his or her absence by the Harbour Master. In exceptional cases the Governor will allow pratique to be given after 9.00 p.m.

### **Application of Regulations**

3. With a view to restricting the range of application of these Regulations the measures specified in them apply in respect, not of a whole country, but only of the infected place, if the Health Officer is satisfied that the country in which the infected place is situated -

- (a) takes the measures necessary to prevent export of rags, clothing and bedding from that place unless they have been previously disinfected; and
- (b) takes measures necessary to check the spread of the disease.

### **Infected place**

4. A place ceases to be regarded as infected if the Health Officer is satisfied that—

- (a) there has been no new case of plague or yellow fever within 6 days, cholera within 5 days, smallpox within 14 days, or of typhus within 12 days of the

- isolation, or of the death or recovery, of the last case;
- (b) infected things have been disinfected or destroyed, and in the case of plague measures have been taken with a view to the destruction of rats in the infected locality, and in the case of yellow fever, of mosquitoes on and near the infected premises.

### **Inspection of infected or suspected ships**

**5. (1)** Every infected or suspected ship must be inspected as soon as possible after arrival by the Health Officer, who may -

- (a) board any ship arriving in the waters of St Helena;
- (b) inspect every person in the ship;
- (c) if he or she thinks proper, call for inspection of the ship's books and papers.

**(2)** The Health Officer may use every lawful means which seems to him or her expedient for ascertaining the state of health of the persons on board and the sanitary condition of the ship.

**(3)** The master of any ship, or any other person must answer truly and, if required, in writing and on oath, all such questions put to him or her by, and give all such information to, the Health Officer as may be necessary for any purpose of these Regulations.

### **Treatment of infected ships**

**6. (1)** Every infected ship must be dealt with as follows:

- (a) the sick, if passengers for St Helena (but not otherwise except by special authority of the Governor in Council on the recommendation of the Health Officer) must as soon as possible be removed from the ship and isolated;
- (b) the other persons on board, if passengers for St Helena (but not otherwise except by special authority of the Governor in Council on the recommendation of the Health Officer) must be permitted to land and be kept under observation or subjected to surveillance;
- (c) clothing and articles belonging to the passengers or crew which, in the opinion of the Health Officer, are infected must be disinfected or destroyed at the expense of the owner and such expense may be recovered by summary process;
- (d) those parts of the ship that have been occupied by the sick must be disinfected, and also any other parts of the ship the Health Officer regards as infected;
- (e) in the case of plague - measures must be taken either before or after discharge of cargo to secure the destruction of rats on board as far as practicable. This operation must be commenced as soon, and carried out with as little delay, as possible, and its duration must not in any case exceed 48 hours;
- (f) in the case of yellow fever - measures must be taken to secure the destruction of mosquitoes and their larvae on board;
- (g) in the case of cholera - the bilge water, after preliminary disinfection, must be pumped out, and the drinking water on board be replaced by a fresh supply of wholesome water.

**(2)** When observation is resorted to under paragraph (b), the period is—

- (a) plague or yellow fever - 6 days;
- (b) cholera - 5 days;

(c) smallpox - 14 days;

(d) typhus - 12 days.

In applying these measures the date of the last case and the condition of the ship should be taken into account.

(3) When any measures the Health Officer considers necessary, in accordance with this regulation, have been carried out, the ship must immediately be admitted to free pratique.

### **Treatment of suspected ships**

7. (1) Suspected ships must be dealt with as follows—

(a) the passengers and crew may be subjected to surveillance during a period which must not exceed 5 days in the case of plague and cholera, 6 days in the case of yellow fever, and 16 days in the case of smallpox. The period of surveillance dates from the arrival of the ship;

(b) paragraphs (c), (d) and (g) of regulation 6 also apply to suspected ships; and the measures specified in paragraphs (e) and (f) should also be applied.

(2) When any measures the Health Officer considers necessary, in accordance with this regulation, have been carried out, the ship must immediately be admitted to free pratique.

### **Treatment of healthy ships**

8. (1) Healthy ships must be admitted to free pratique immediately on arrival, irrespective of the nature of their bill of health. They may, however, at the discretion of the Health Officer, be subjected to the measures specified in paragraphs (c), (e), (f) and (g) of regulation 6; and the passengers and crew may be subjected to surveillance which must not exceed 6 days in the case of plague or yellow fever, 5 days in the case of cholera, 14 days in the case of smallpox, and 12 days in the case of typhus.

(2) The period of surveillance dates from the departure of the ship from the infected place.

(3) The application of the measures specified in paragraph (c) of regulation 6 can be justified only by special reasons and those of paragraph (e) of regulation 6 are not to be applied as a general rule.

(4) In those cases where the provisions of paragraph (e) of regulation 6 are applied, the operation must not in any case exceed 24 hours, and must not interfere with the free circulation of passengers and crew between ship and shore.

### **Rats in healthy ships**

9. (1) If in a healthy ship the rats on board are found to be suffering from plague -

(a) the Health Officer must visit the ship;

(b) measures must be taken as in paragraphs (c) and (e) of regulation 6;

(c) the parts of the ship that the Health Officer may regard as infected must be

disinfected; and

- (d) the passengers and crew may be subjected to observation or surveillance as the Health Officer thinks fit, not exceeding a period of 5 days after arrival, unless in exceptional cases when the period may be extended to 10 days.

(2) If it is thought necessary to resort to measures of rat destruction these must be carried out as specified in paragraph (e) of regulation 6.

### **Disinfection of ships previously disinfected**

10. (1) Ships from an infected place which have been disinfected must not again be subjected to sanitary measures on their arrival in another port, if in the opinion of the Health Officer of that port the measures applied were effective, unless a fresh case of infectious or contagious disease has occurred on board since disinfection or unless they have again called at an infected place.

(2) A ship is not to be regarded as having called at a place if it has merely disembarked passengers and their baggage or mails, without having been in communication with the shore.

### **Landing of passengers**

11. If a ship has passengers on board who are in a filthy or otherwise unwholesome condition, or is overcrowded with passengers, emigrants, or otherwise, or has a case of illness of doubtful nature aboard, the Health Officer may, if it is in his or her opinion desirable, with a view to preventing the introduction of any infectious or contagious disease, prevent the landing of any or all such passengers or emigrants during the time of the vessel's stay.

### **Exemption from observation or surveillance**

12. If measures of observation or surveillance are prescribed, the Health Officer may exempt from their application any person who is, in the opinion of the Health Officer, immune to the infectious or contagious disease on account of which these measures are applied.

### **Observation of ships whose health is unsatisfactory**

13. Whenever a ship comes from an infected port or place, or it appears from the answers or declaration made by the master that the health of the ship is not wholly satisfactory, the Harbour Master must place the ship under observation until released by the Health Officer.

### **Treatment of persons under surveillance**

14. (1) Where these regulations provide that a person may be permitted to proceed to his or her place of destination subject to surveillance, the Health Officer, before granting such permission, must be satisfied that it is reasonably probable that the person to whom it is granted will duly comply with the conditions of surveillance, and permission if granted, must be upon the following conditions—

- (a) the person must satisfy the Health Officer as to his or her name, intended place of destination, and place of residence there;
- (b) the person must agree to, and must, present himself or herself for medical supervision during the prescribed period, and may be required by the Health Officer to deposit a sum not exceeding £2, which may be forfeited if the person fails to so present himself or herself;
- (c) the place must, in the opinion of the Health Officer, be conveniently situated for the medical supervision.

(2) If the Health Officer is not satisfied as required by sub-regulation (1), or if a person under surveillance fails to comply with paragraphs (a) and (b) of that sub-regulation, the Health Officer may detain the person under observation, or direct him or her to proceed to a specified place and there remain under medical supervision during the prescribed period. In the latter case sub-regulation (1)(b) may, at the discretion of the Health Officer, be applied to the person.

(3) In the case of smallpox a person may be required to produce to the Health Officer satisfactory evidence of having been successfully vaccinated or re-vaccinated within the 10 years immediately preceding, or of being otherwise immune to the disease, and such persons may in the absence of such evidence be detained under observation for the prescribed period.

### **Disinfection of merchandise**

15. (1) Subject to sub-regulation (2), all merchandise must be disinfected if, in the opinion of the Health Officer, it is infected.

- (2) In the case of -
  - (a) plague, cholera and smallpox - rags, clothing, and bedding may, when imported from an infected place as merchandise, be subjected to disinfection even in the absence of evidence that they are infected or their introduction into St Helena may be prohibited;
  - (b) yellow fever - merchandise is under no circumstances liable to disinfection or prohibition.

### **Exemption for mails**

16. (1) Nothing in these regulations renders liable to detention, disinfection, or destruction any article forming part of any mail (other than a parcel mail) conveyed under the authority of the postal administration of any Government, or prejudicially affects the delivery in due course of any such mail (other than a parcel mail) to the Post Office.

(2) The only measures to which parcel mails may be subjected are disinfection or destruction of articles which are in the opinion of the Health Officer infected.

### **Measures when St Helena an infected place**

- 17. (1) If St Helena is an infected place -
  - (a) measures must be taken to prevent the embarkation of any persons showing symptoms of infectious or contagious disease, and to this end, every person

taking passage on a ship leaving St Helena must be examined by the Health Officer immediately before the departure of the vessel. Such examinations must, as far as practicable, be made by day and on shore;

- (b) measures must be taken to prevent the exportation of merchandise or articles which the Health Officer considers infected, unless such merchandise or articles have, in the first instance, been disinfected on shore under his or her supervision;
- (c) in the case of plague - measures must be taken to prevent rats from gaining access to ships;
- (d) in the case of cholera - care must be exercised that drinking water taken on board is wholesome.

(2) The Health Officer must give to the master of the ship a certificate stating in detail the measures taken pursuant to sub-regulation (1).

### **Healthy ship from infected port**

18. (1) When, in the case of a healthy ship from a port which is an infected place, the Health Officer at the port of arrival is satisfied that the measures specified in regulation 17 have been efficiently carried out, she ship must, subject to sub-regulation (2), be exempted from the measures specified in regulation 8.

(2) If the period specified in regulation 8, dating from departure of the ship from he infected place, has not been completed, the passengers and crew may be subjected to surveillance of such duration as is necessary to complete the period.

### **Measures in respect of ships with certain diseases**

19. (1) No measures are to be taken against any ship merely because it has come from or called at any place where enteric fever, cerebro-spinal fever, scarlet fever, measles, whooping cough, chicken-pox, dengue, anterior poliomyelitis or severe epidemic influenza exists.

(2) If a case of any of these diseases has occurred on board a ship before leaving the port of departure, during the voyage, or on arrival, the measures that may be applied are be limited to isolation of the sick, disinfection of infected clothing, bedding, and effects, and of the compartment of the vessel occupied by the sick and of such other parts of the ship as the Health Officer considers infected, and observation or surveillance of those who have been in contact with the sick person or persons.

### **Sanitary anchorage and sanitary station**

20. (1) The following is hereby declared to be the sanitary anchorage—  
Abreast of Break Neck Valley.

(2) The sanitary station is—

That part of Lemon Valley which is set apart for a sanitary station.

### **Identification of ships at the sanitary anchorage**

21. All ships ordered to the sanitary anchorage must have displayed by day a yellow flag at the foremast head, and by night at the foremast 2 lighted lanterns, one over the other, at not more than 6 or less than 4 feet apart.

#### **Identification of guard boats**

22. All guard boats must display a similar yellow flag at the stern by day, and from sunset to sunrise a light at bow and stern.

#### **Removal of ships from sanitary anchorage**

23. Ships must not be removed from the sanitary anchorage without the written permission of the Health Officer unless they are about to depart from St Helena.

#### **Isolation of ships at the sanitary anchorage**

24. No boatmen except the boatmen of the Observation Guard may come within 200 yards of any ship flying the signals specified in regulation 21.

#### **Communication with ships at the sanitary anchorage**

25. No person except the Health Officer, the Harbour Master or persons authorised by either of them may communicate with or approach within 200 yards of any ship flying the yellow flag, and the persons on board must not communicate with the shore except through the observation guard boat.

#### **Detention of persons at the sanitary station**

26. Whenever any persons are detained at the sanitary station a yellow flag must be kept hoisted by day at a conspicuous place on the station, and by night the lights required by regulation 21 in the case of ships must be displayed.

#### **Communication with the sanitary station**

27. No person except the Health Officer or persons authorised by him or her may land at the sanitary station when the yellow flag is flying or the prescribed lights are shown.

#### **Guards at the sanitary station**

28. The Director of Police must, on the requisition of the Harbour Master, supply the necessary guards required to enforce these regulations in respect of the sanitary station.

#### **Pratique from the sanitary station**

29. No person who has been detained at the sanitary station may, on any pretext whatsoever, leave the station until he or she has been admitted to pratique by the Health Officer.

#### **Boats for landing of passengers and crew at the sanitary station**

**30.** The master of a ship ordered to the sanitary anchorage must, if required by the Harbour Master, provide the necessary boats and appliances for the landing of the passengers and crew at the sanitary station.

### **Reporting of passengers under observation**

**31.** The Harbour Master must report without delay to the Chief Secretary all cases in which it is found necessary to place the passengers of a ship arriving at St Helena under observation.

### **Fee for Bill of Health**

**32.** For all Bills of Health granted by the Health Officer a fee of £1 is payable by the master or agent of the vessel.

### **Responsibility of Harbour Master**

**33.** The Harbour Master is personally responsible to ensure that the orders of the Health Officer are strictly carried out.

### **Visit of Harbour Master to observation stations**

**34.** The Observation Stations must be visited daily by the Harbour Master or his or her Coxswain, who is to provide water and provisions as required.

### **Exemption of H.M. ships**

**35.** Her Majesty's Ships of War are exempted from these Regulations.

### **Penalty for non-compliance with regulations**

**36. (1)** It is an offence for a person to contravene any of regulations 14(2), 21, or 22.  
Penalty: A fine of £500.

**(2)** It is an offence for a person to contravene any of regulations 5(3), 24, 25, 27, 29 or 30.  
Penalty: A fine of £5,000.

---
