

This is a regular weekly update to the classification of countries based on their current 14-day COVID-19 reported cumulative case prevalence rate published by the European Centre for Disease Prevention and Control (ECDC), and the latest quarantine status issued by the UK Government.

- GOLD:** No reported cases in last 14 days and exempt from UK quarantine
- GREEN:** 14-day reported cumulative case prevalence higher than zero but less than the medium threshold (0.04%) and exempt from UK quarantine
- AMBER:** 14-day reported cumulative case prevalence above the medium threshold (0.04%) but less than the high threshold (0.10%) or countries who are below the medium threshold but not exempt from UK quarantine
- RED:** All countries with 14-day reported cumulative case prevalence above the high threshold (0.10%)
- Not classified:** Countries not exempt from UK quarantine but with no reported cases, and countries whose data are not reported by ECDC
- Note:** Cases reported on Ascension or the Falkland Islands will only be included in prevalence rates if they are detected outside of quarantine

### Classification changes since the last update on December 15, 2020:
