ST HELENA LEGISLATIVE COUNCIL

PANEL OF INVESTIGATORS 2026

Laid upon the Table 19 March 2026

ST HELENA LEGISLATIVE COUNCIL

PANEL OF INVESTIGATORS

Pursuant to the provisions of Order 27, Rule 7, of the Council's Standing Orders, the following list shows the names of persons comprising the Panel of Investigators, constituted for the purpose specified in the Code of Conduct for Members of Legislative Council:

Mr Alasdair Bain
Mrs Catherine Cranfield
Mr Paul Laban
Mrs Kamar Tanyan

This list supersedes all previous lists of the Panel of Investigators.

Anita Legg
Clerk of Councils

Approved by Legislative Council on day of 2026

the 1990s, the number of people with a university degree has increased from 10% to 20% of the population.

There are a number of reasons for this increase. One is that the population is getting older. The number of people aged 65 and over has increased from 10% to 15% of the population. This is due to a combination of factors, including a decline in the birth rate and an increase in life expectancy.

Another reason is that the economy is changing. The service sector is growing, and this is creating more jobs for people with university degrees. The manufacturing sector is shrinking, and this is leading to a loss of jobs for people with lower qualifications.

There are also a number of policy factors that have contributed to the increase. The government has invested in higher education, and this has led to an increase in the number of people attending university. The government has also introduced policies that encourage people to get a university degree.

There are a number of challenges that the education system faces. One is that the cost of higher education is increasing. This is making it more difficult for people to afford to go to university. The government is trying to address this by increasing funding for higher education.

Another challenge is that the skills of the workforce are not always up to date. The education system is not always providing the skills that are needed in the economy. The government is trying to address this by introducing reforms to the education system.

There are a number of opportunities for the education system. One is that the economy is growing, and this is creating more jobs. The education system can play a role in preparing people for these jobs. The government is trying to address this by investing in education.

Another opportunity is that the population is getting younger. This is creating a larger pool of people who are eligible for higher education. The government is trying to address this by increasing funding for higher education.

There are a number of challenges that the education system faces. One is that the quality of education is not always high. The government is trying to address this by introducing reforms to the education system.
