ROAD TRAFFIC ORDINANCE, CAP. 101

PERMISSION TO USE VEHICLES TO LAUNCH SEA RESCUE BOATS

The Licensing Officer has certified that the three launching dollies used by the Sea Rescue Service to launch the sea rescue boats are of such exceptional kind that it is proper to permit their use on a road without compliance with all such provisions of the regulations as would otherwise apply to their use. By virtue of regulation 3(2) of the Road Traffic Regulations, Cap. 101, I therefore permit their use subject to the following conditions:

1. The launching dollies will be used only in connection with the launching or maintenance of the Sea Rescue Boats.
2. The launching dollies will be used only on the road that runs between the Sea Rescue facility in Ruperts to the Slip Way also located in Ruperts.
3. The launching dollies will be towed at a maximum speed of 5 miles per hour.
4. When being towed, the launching dollies will have a member of staff at the rear of the dolly as a safety marshal.
5. The launching dollies will be subject to weekly safety inspections as to the general condition for the task for which they are being used.
