and in this subsection “**the material time**” means the time of the alleged offence.

(6) In this section “**unfit to drive through drink or drugs**” means under the influence of drink or drugs to such an extent as to be incapable of having proper control of a motor vehicle.

Breath tests and other specimens

40. (1) A police officer who has reasonable cause (other than the mere fact that a person has been observed to leave premises in which it is known that alcohol has been consumed by persons in them) to suspect that a person—

- (a) has committed or is committing an offence under this Part; or
- (b) was driving or in charge of a motor vehicle at a time when the vehicle was involved in a road traffic accident,

may require that person to supply a specimen of breath for analysis using an approved screening device.

(2) If an approved screening device is not readily available to a police officer who is entitled to a requirement as mentioned in subsection (1), the officer may require the person of whom he or she is entitled to make the requirement to accompany the officer to a police station or other place where an approved screening device or an approved measuring device is available for use.

(3) If the result of an analysis of breath under subsection (1) leads a police officer to suspect that the person who supplied the specimen might be guilty of an offence against this Part, the officer may arrest the person; and whether or not the officer arrests the person, he or she may require the person to supply a further 2 specimens of breath for analysis using an approved measuring device.

(4) A police officer who is entitled to require a person to provide a specimen of breath for analysis using an approved screening device may, if an approved measuring device is available for use at the location where that requirement would otherwise be made, instead of making that requirement, require the person to supply 2 specimens of breath for analysis using an approved measuring device.

(5) If it appears to any police officer who is entitled to require any person to supply a specimen of breath for the purposes of this section that, by reason of—

- (a) the inability of the person to comply with such a requirement; or
- (b) the unavailability of an approved device or a reliable approved device; or
- (c) any other cause,

it is not practicable to require such a specimen to be provided, the officer may require the person to accompany the officer to a police station or hospital, and there to provide either a specimen of blood or a specimen of urine (the decision as to which type of specimen to require being made by the officer) for analysis.

(6) A specimen of blood must not be taken for the purposes of this section except by or under the direct supervision of a public officer employed at the General Hospital in Jamestown who is qualified to take blood samples.

(7) If it appears to a police officer of the rank of inspector or above (“**the senior officer**”) that a person whom a police officer has power to require to provide a specimen of breath under subsection (1)(b), arising out of an accident in which injury was caused to any person other than the suspect, is in any building, vehicle or other closed place, and that access to that place cannot be gained by any other means without allowing an opportunity for the ends of justice to be defeated -

- (a) the senior officer may order the use of such force as is reasonably necessary in order to gain access to such closed place; and
- (b) the use of such force is a lawful use of force.

Failure to provide specimen

41. (1) It is an offence for a person, without reasonable cause, to fail to -

- (a) supply any specimen of breath, blood or urine which the person has been required to provide under section 40; or

(2) A court must not entertain any argument relating to the suitability or reliability of any approved device.

(3) A device is sufficiently described, in any rules made under this section, if it is described by a trade or other name by which it is known or marketed.

(4) Rules made under this section may contain provisions regulating the manner in which any approved device is to be operated.

Prescribed limit

43. The prescribed limit referred to in section 39 is whichever is appropriate of the following limits, namely—

- (b) 115 milligrammes of alcohol per 100 millilitres of blood; or
- (c) 153 milligrammes of alcohol per 100 millilitres of urine.

Evidence

44. (1) In every case of an offence alleged to have been committed against

section 39, evidence of the result of any analysis of any specimen of breath, blood or urine taken under section 40 is admissible in evidence, and the court must, subject to subsection (1A), presume that the proportion of alcohol in the defendants breath, blood or urine at the time of the alleged offence was not less than the proportion revealed by such analysis.

(1A) The presumption under subsection (1) must not be made if the court is satisfied (by evidence on oath) that the defendant consumed such an amount of alcohol, after he or she ceased to drive or be in charge of the vehicle, as would be likely to account for the amount by which the result of such analysis exceeded the prescribed limit.

(2) Evidence of the proportion of alcohol in a specimen of breath may be given by the police officer who operated the approved device by which the specimen was analysed or by the production of a certificate of the kind described in subsection (3)(a), but a person must not be convicted unless it is proved—

- (a) that 2 separate specimens of breath were analysed by an approved measuring device; and
- (b) that the lower of the 2 results disclosed a proportion of alcohol in the specimen which exceeded the prescribed limit.

(3) Evidence of the proportion of alcohol or drug in a specimen of breath, blood or urine may, subject to subsections (5) and (6), be given by the production of a document or documents purporting to be whichever of the following is appropriate, that is to say—

- (a) a statement automatically produced by the approved measuring device by which the proportion of alcohol in a specimen of breath was measured and a certificate signed by a police officer (which may but need not be contained in the same document as the statement) that the statement relates to a specimen provided by the accused at the date and time shown in the statement; or
- (b) a certificate signed by an approved analyst as to the proportion of alcohol or any drug found in a specimen of blood or urine identified in the certificate.

(4) Subject to subsections (5) and (6), evidence that a specimen of blood was taken from the accused by a public officer referred to in section 40(6) may be given by the production of a document purporting to certify that fact and to be signed by such public officer.

(5) Subject to subsection (6)—

- (a) a document purporting to be such a statement or such a certificate (or both such a statement and such a certificate) as is mentioned in subsection (3)(a) is admissible in evidence on behalf of the prosecution in pursuance of this section only if a copy of it either was handed to the accused when the document was produced or has been served on him or her not later than 7 days before the hearing; and
- (b) any other document is so admissible only if a copy of it has been served on the accused not later than 7 days before the hearing.

(6) A document purporting to be a certificate (or so much of a document as purports to be a certificate) is not so admissible if the accused, not later than 3 days before the hearing or within any further time the court in special circumstances allows, has served notice on the prosecutor requiring the attendance at the hearing of the person by whom the document purports to be signed.

(7) In this section “**approved analyst**” means a person appointed by the Governor

by notice in the *Gazette* to be an approved analyst for the purposes of this section.

Further provisions as to specimens

45. (1) Every specimen of blood or urine provided by a person under this Part must be divided into 2 approximately equal parts, and—

- (a) subject to paragraph (b), only one part of it is to be analysed, and the other part (“**the retained part**”) is to be preserved until the conclusion of all proceedings for any offence in connection with which the specimen was provided;
- (b) the court which tries any alleged offence upon the trial of which the prosecutor relies upon evidence of the result of the analysis of a specimen of blood or urine provided under this Part, may (if it appears to be in the interest of justice so to do) order that the retained part is to be analysed, and adjourn the hearing to enable such analysis to be carried out;
- (c) a court which makes an order under paragraph (b) may order that the analysis be carried out by or under the supervision of any medical officer the court thinks fit, and a medical officer to whom such an order is addressed must comply with it and send a report of the result of the analysis, as soon as practicable, to the Clerk of the Peace.

(2) A specimen of urine must be provided within one hour of being required, and after the provision of a previous specimen of urine (such previous specimen being discarded).

Hospital patients

46. If a person is at a hospital as a patient, a police officer must not require the person to provide any specimen of breath, blood or urine for the purposes of this Part unless the medical officer in charge of the patient’s treatment has been notified of the officer’s intention to require the specimen and has confirmed that such a requirement would not be prejudicial to the health or treatment of the patient.

Power of arrest

46A. A police officer may arrest without warrant a person whom the officer reasonably suspects of committing an offence against any of sections 39(3), 39(4), or 41(1).

Mandatory disqualification

(1) Subject to subsection (2), on convicting any person of an offence under this Part, the court must (in addition to any other sentence or order) make an order of disqualification (that is, an order of the type described in section 23) for a period of at least 12 months; or, if the offender has, within the period of 5 years preceding the date of the offence been convicted of such an offence, for a period of at least 3 years.

(2) If, for special reasons established by evidence upon oath in any particular case, the court considers that it would be inappropriate to make an order as mentioned in subsection (1), the court may order disqualification for a shorter period than that otherwise required, or refrain from making an order of disqualification; but no fact or circumstances may a “special reason” unless it relates to the commission of the offence, as distinct from a fact or circumstance concerning the offender.

PART III SPEED MEASURING DEVICES

Radar devices

- 8. The following radar device is prescribed as a speed measuring device for the purpose of section 29(1) of the Ordinance—
The Muniquip T3.

Testing of radar devices

- 9. (1) A radar device must be submitted to a testing officer at least once in every 12-month period for the purpose of inspection and calibration.
- (2) The testing of a radar device must be such as will ascertain with respect to the speed computing components of the radar device that—
 - (a) the circuit is in accordance with the manufacturer's circuit design, including any modification to that design by the manufacturer or the testing officer; and
 - (b) the radar device is in a satisfactory electrical condition and, in particular, that any maintenance which has been carried out has been carried out satisfactorily.
- (3) The testing of a radar device must be such as will indicate that the device is properly calibrated. A visible sticker showing the date of calibration must be attached to the radar device by the person who carried out such calibration.
- (4) The testing officer must, after completing the testing of a radar device in accordance with this regulation, complete a test certificate in the form set out in regulation 13 to the effect that the device has been properly tested and is in a satisfactory operational condition.

Sealing of radar device

- 10. If a radar device is found to be in a satisfactory condition after being tested, the testing officer must seal the device by placing an appropriate security seal across a part of the device that if opened will cause the breaking of the seal.

Field testing of radar device

11. Before using a radar device to determine the speed of any particular vehicle, a field testing officer should perform the following tests—

- (a) the radar device should be tested against a vehicle fitted with a suitably calibrated speedometer;
- (b) the area in which the radar device is to be used should be tested for possible sources of radio interference; and
- (c) a tuning fork should be struck and vibrated in front of the aerial of the radar device. The reading on the device should correspond with the reading on the fork.

Use of radar device

12. (1) The prescribed manner of use of the radar device for the purpose of section 29(1) of the Ordinance is, in the case of the Muniquip T3 radar device, as follows—

- (a) if in the opinion of a police officer, a vehicle is considered to be exceeding the speed limit, the radar device should be pointed at the vehicle and a reading taken;
- (b) the reading should be observed for at least 3 seconds and during that period the reading should be steady. An erratic series of numbers would indicate that an erroneous reading has been taken, and that the measurement was invalid;
- (c) if the reading is considered correct, the trigger in the handle of the radar device should be squeezed, and the speed reading fixed on the display.

(2) A radar device must not be used unless it has been tested in accordance with regulation 9 within 12 months before the occasion of its use and a satisfactory test certificate issued.

Certificate as to testing and sealing of radar device

13. (1) A certificate referred to in section 29(2) of the Ordinance is in the prescribed form if it states—

“The radar device bearing number [number of device] has been tested in accordance with regulation 9 of the Road Traffic Regulations, 1985 on [date of test] and has been found to operate correctly in accordance with those Regulations. The device has also been properly sealed in accordance with regulation 10.

Dated:

(Signature)
Testing Officer”.

(2) In accordance with the provisions of section 29(2) of the Ordinance, a testing officer is an authorised person for the purpose of these Regulations.

Interference with radar devices

14. A person must not, without proper authority, wilfully interfere with the time measuring or speed computing components of a radar device or any seal affixed to such a device.

PART IV DRIVING LICENCES

Definition of “driving licence”

15. In this Part of these regulations “**driving licence**” means a licence granted under Part V of the Ordinance.

Signature of driving licence

16. Every person to whom a driving licence is granted must forthwith sign it with his or her usual signature. If the person fails to do so, or if on production of the driving licence to any person entitled to demand production of the licence it does not bear the person’s usual signature, the person commits an offence.

Penalty: A fine of £10.

Duplicate driving licence

17. (1) If the Licensing Officer is satisfied that any original driving licence has been lost or defaced -

- (a) the Licensing Officer must on the payment of the prescribed fee issue to the person to whom the original licence was granted a duplicate of it containing any endorsements of the original licence; and
- (b) such duplicate has the same effect as the original licence.

(2) A person to whom a duplicate driving licence has been issued because an original driving licence has been lost who finds the original licence during the currency of it must return the original licence to the Licensing Officer.

Provisional licence

18. A provisional licence must only be granted subject to the conditions that until the holder of it has passed the appropriate test—

- (a) except when the holder is undergoing a test, the holder must, in the case of a vehicle which is constructed or adapted to carry more than one person (other than a motor cycle without a sidecar or a quadricycle), use it only under the supervision of a person who is present in the vehicle with the holder and who holds, and has held for at least 2 years, a driving licence (not being a provisional driving licence) authorising that person to drive a vehicle of the same class as the vehicle being driven by the holder of the provisional licence;
- (b) the holder must not, in the case of a motor cycle without a sidecar or a quadricycle, carry a passenger unless that passenger holds, and has held for at least 2 years, a driving licence (not being a provisional licence) authorising that person to drive either a motor cycle or a quadricycle;
- (c) the holder must comply with any further requirements relating to the driving of motor vehicles stated in the provisional licence;
- (d) the vehicle while being driven by the holder must clearly display in a conspicuous position on the front and on the back of the vehicle a distinguishing mark in the form of a letter L in red on a white ground, which letter must be not less than 4 inches high.

PART V

Definition of “licence”

19. In this Part, “**licence**” means a licence for a motor vehicle or trailer issued under section 16 of the Ordinance.

Number of passengers in public service vehicle

20. (1) The maximum number of passengers permitted to be carried in a public service vehicle must not exceed the number, exclusive of the driver, specified by the manufacturer of the vehicle, or, if no such number was specified or if the vehicle was not constructed by the manufacturer for the carriage of passengers, a number the Licensing Officer determines.

(2) In this regulation “**passengers**” includes any 2 persons who are not less than 2 nor more than 12 years of age, and does not include any infant of less than 2 years of age.

Indication on public service vehicle of maximum number of passengers

(3) The registration mark must be exhibited on the front and back of the vehicle.

(4) (a) Except as provided in paragraph (b), the registration mark of every motor vehicle must be exhibited so that in normal daylight the characters of the front and rear registration marks are easily distinguishable by an observer directly in front of or behind the vehicle, as the case may be, who is not less than 10 feet and, in the case of a motor cycle, quadricycle or invalid carriage, not more than 60 feet and in every other case not more than 75 feet from the registration mark observed.

(b) It is not necessary for a motor cycle, quadricycle or invalid carriage to display a front registration mark and in no case may such a vehicle carry a number plate which could cause injury to any person by reason of its projection.

(c) Subject to regulation 70, whenever during the hours of darkness a motor vehicle is upon a road -

- (i) a lamp must be kept burning and so contrived as to illuminate, by means of reflection, transparency or otherwise, every letter and figure of the registration mark exhibited on the back of the motor vehicle (or on the rearmost vehicle attached to the back of the motor vehicle as the case may be) and to render them easily distinguishable in the absence of fog by an observer directly behind the vehicle who is not less than 10 feet, and in the case of a motor cycle, quadricycle or invalid carriage not more than 50 feet and in every other case not more than 60 feet from the registration mark; and
- (ii) the lamp must be on the motor vehicle or such rearmost vehicle as the case may be.

(5) (a) Unless the registration mark is so constructed that it can be illuminated by transparency or translucency, it must be formed of white, silver or light grey letters and figures upon a black surface and every letter or figure must be indelibly inscribed or so attached to such surface that it cannot readily be detached from it. If the letters and figures are exhibited on a flat plate, the plate may be constructed of cast or pressed metal having raised letters and figures.

(b) If the registration mark is so constructed and used that it is illuminated by transparency or translucency, the letters and figures must all, when so illuminated during the hours of darkness, appear white against a black background.

(c) Notwithstanding sub-paragraphs (i) and (ii) of this paragraph, a registration mark may lawfully be exhibited in accordance with this paragraph, in which case it must be exhibited on a plate which is constructed of reflex reflecting material, being a plate which complies with the requirements laid down by the British Standard Specification for Reflex Reflecting Number Plates published on 11th September 1972 under the number B.S. AU 145a and is of a type in respect of which there has been issued by the Secretary of State a certificate that a plate of that type complies with those requirements, and in such a case—

- (i) the registration mark, if it is displayed on the front of the vehicle, must be formed of black letters and figures upon a white background and if it is displayed on the back of the vehicle must be formed of black letters and figures upon a yellow background;
- (ii) that part of the plate which comprises the said background must be constructed of reflex reflecting material which must at all times be maintained in a clean and efficient condition;
- (iii) no reflex reflecting material may be applied to any part of the said letters or figures; and
- (iv) there must be legibly and permanently marked on the plate the specification number B.S. AU 145a to indicate that it complies with the British Standards Specification mentioned above.

(d) Subject to paragraph (e) of this sub-regulation, the letters and figures must be 3½ inches high, every part of every letter and figure must be 5⁄8 inch broad, the total width of the space taken by every letter or figure except the figure 1 must be 2½ inches and the space between adjacent letters or figures must be half an inch.

(e) In the case of a motor cycle, quadricycle or invalid carriage the dimensions prescribed in paragraph (d) of this sub-regulation may be halved.

(f) if a motor vehicle is not licensed for a continuous period of 3 years from the date of first issue or the renewal of its licence, whichever is the later, the Licensing Officer may at his or her discretion reallocate the registration mark assigned to such motor vehicle upon giving the owner of it 7 days prior notice in writing.

PART VI CONSTRUCTION AND USE

Speed indicator

23. (1) There must be fitted to every motor vehicle, other than one mentioned in sub-regulation (2), an instrument so constructed and in such a position as at all times readily to indicate to the driver of the vehicle within a margin of accuracy of 10% whether he or she is driving at a speed in excess of that permitted by these Regulations.

(2) Sub-regulation (1) does not apply to—

- (a) a land tractor;
- (b) an invalid carriage;
- (c) a motor cycle the cylinder capacity of the engine of which does not exceed 100 cubic centimetres;

25. Every motor vehicle must be so designed and constructed that the driver of it while controlling the vehicle can at all times have a full view of the road and traffic ahead of the vehicle.

Driving mirror

26. Every motor vehicle other than a motor cycle must be equipped with a mirror so constructed and fitted to the vehicle as to assist the driver, if he or she so desires, to become aware of traffic to the rear of the vehicle.

Safety glass

27. The glass of windscreens and windows facing to the front on the outside of any motor vehicle must be of safety glass.

Windscreen wiper

28. An efficient automatic windscreen wiper must be fitted to ~~every~~ **any** motor vehicle which is so constructed that the driver cannot, by opening the windscreen or otherwise, obtain an adequate view to the front of the vehicle without looking through the windscreen.

Instrument for warning of approach

29. (1) Every motor vehicle must be fitted with an instrument capable of giving

audible and sufficient warning of its approach or position:

(2) An instrument required by sub-regulation (1) must not consist of a siren, gong or bell, except in the case of a motor vehicle used for fire-brigade, ambulance or police purposes.

Silencer

30. (1) Every vehicle propelled by an internal-combustion engine must be fitted with a silencer, expansion chamber or other contrivance suitable and sufficient for reducing so far as is reasonable the noise caused by the escape of the exhaust gases from the engine.

- (2) With the approval of the Governor the Licensing Officer may appoint-
- (a) a method of measuring the noise caused by the escape of the exhaust gases from an internal-combustion engine; and
 - (b) a level of noise above which such noise so measured is not deemed to be reduced as far as is reasonable.

Smoke and visible vapour, construction

31. Every motor vehicle must be so constructed that no avoidable smoke or visible vapour is emitted from it.

Stop light

| Overall length | 25 feet. |
| Wheelbase | 13 feet 7 inches. |
| Height, exclusive of hood or covering | 11 feet 6 inches. |

(1A) The Licensing Officer may give permission in writing, subject to any conditions he or she imposes, for the use of a motor vehicle of greater dimensions than those set out in sub-regulation (1).

- (2) In this regulation—
- “**overall length**” of a vehicle means the length exclusive of any starting handle and of any hood when lowered;
- “**overall width**” means the width measured between vertical planes parallel to the longitudinal axis of the vehicle and passing through the extreme projecting points of the vehicle, exclusive of any mirror conforming with the provisions of regulation 26.

Maximum overhang

34. (1) The overhang of a motor vehicle must not exceed 7/24ths of the overall length.

(2) In this regulation, “**overhang**” means that part of the overall length of a vehicle measured by a line from the centre of the rear axle along the longitudinal axis of the vehicle to the rear of the vehicle exclusive of any hood when lowered.

Brakes of certain types of motor vehicle

35. (1) Every motor vehicle other than a land tractor, industrial tractor, motor cycle or invalid carriage must be equipped with an efficient braking system or efficient braking systems, in either case having 2 means of operation so designed and constructed that notwithstanding the failure of any part (other than a fixed member or a brake-shoe anchor pin) through or by means of which the force necessary to apply the brakes is transmitted there is available for application by the driver, to not less than half the number of the wheels of the vehicle, brakes sufficient under the most adverse conditions to bring the vehicle to rest within a reasonable distance.

(1A) In the event of a failure as mentioned in sub-regulation (1) it is not necessary for brakes to be available for application by the driver, in the case of a vehicle having less than 4 wheels, to more than one wheel.

(2) The application of one means of operation of brakes must not affect or operate the pedal or hand lever of the other means of operation.

(3) No braking system is to be rendered ineffective by the non-rotation of the engine.

(4) All the brakes of a motor vehicle other than a motor cycle or invalid carriage which are operated by one of the means of operation must be capable of being applied by direct mechanical action without the intervention of any hydraulic, electric or pneumatic device.

(5) In the case of a motor vehicle (other than a land tractor, industrial tractor, motor cycle, quadricycle or invalid carriage) in which any brake is capable of being applied by more than one means of operation, all the wheels must be fitted with brakes all of which are operated by one of the means of operation.

(5A) If means of operation of brakes are provided in addition to those prescribed by this regulation, such additional means of operation may be disregarded for the purpose of sub-regulation (5).

(6) One at least of the means of operation of brakes must be capable of causing brakes to be applied directly and not through the transmission gear to not less than half the number of the wheels of the vehicle.

Brakes of motor cycle

36. (1) Every motor cycle must be equipped with an efficient braking system or

efficient braking systems, in either case having 2 means of operation so designed and constructed that notwithstanding the failure of any part (other than a fixed member or a brake-shoe anchor pin) through or by means of which the force necessary to apply the brakes is transmitted there is available for application by the driver to at least one wheel of the vehicle brakes sufficient under the most adverse conditions to bring the vehicle to rest within a reasonable distance.

(2) The application of one means of operation of brakes must not affect or operate the pedal or hand lever of the other means of operation.

Brakes of invalid carriage

37. Every land tractor, industrial tractor and invalid carriage must be equipped with an efficient braking system, the brakes of which act on at least 2 wheels of the vehicle, so designed and constructed that the application of the brakes will bring the vehicle to rest within a reasonable distance.

Brakes of trailer

38. (1) Except as provided in sub-regulation (2), every trailer exceeding 2 cwt in weight unladen must have an efficient braking system, the brakes of which are capable of being applied when the trailer is being drawn—

- (a) to at least 2 wheels in the case of a trailer having not more than 4 wheels;
- (b) to at least 4 wheels in the case of a trailer having more than 4 wheels; and
- (c) to at least half the number of wheels of the trailer,

so constructed that—

- (i) the brakes can be applied either by the driver of the drawing vehicle or by some other person on that vehicle or the trailer, unless the trailer does not exceed one ton in weight unladen or is a living van not exceeding 2 tons in weight unladen and in either case the brakes of the trailer automatically come into operation on the overrun of the trailer;
- (ii) the brakes are capable of being set so as effectively to prevent 2 at least of the wheels from revolving when the trailer, whether it is attached to the drawing vehicle or not, is not being drawn.

(2) Sub-regulation (1) does not apply to any broken-down vehicle which is being drawn by a motor vehicle in consequence of the breakdown, or to any land implement, land implement conveyor, agricultural trailer, wheeled cement mixer or mobile air compressor that is being towed to or from a site of work by a land tractor or industrial tractor at a speed of not exceeding 10 mph, or by a motor lorry or land rover at a speed not exceeding 15 mph.

(3) Every agricultural trailer other than a land implement, or land implement conveyor, must be provided with an efficient system of brakes that either automatically comes into operation on the overrun of the trailer or is capable of being actuated by the driver of the drawing vehicle.
