

This is a regular weekly update to the classification of countries based on their current 14-day COVID-19 reported cumulative case prevalence rate published by the European Centre for Disease Prevention and Control (ECDC), and the latest quarantine status issued by the UK Government.

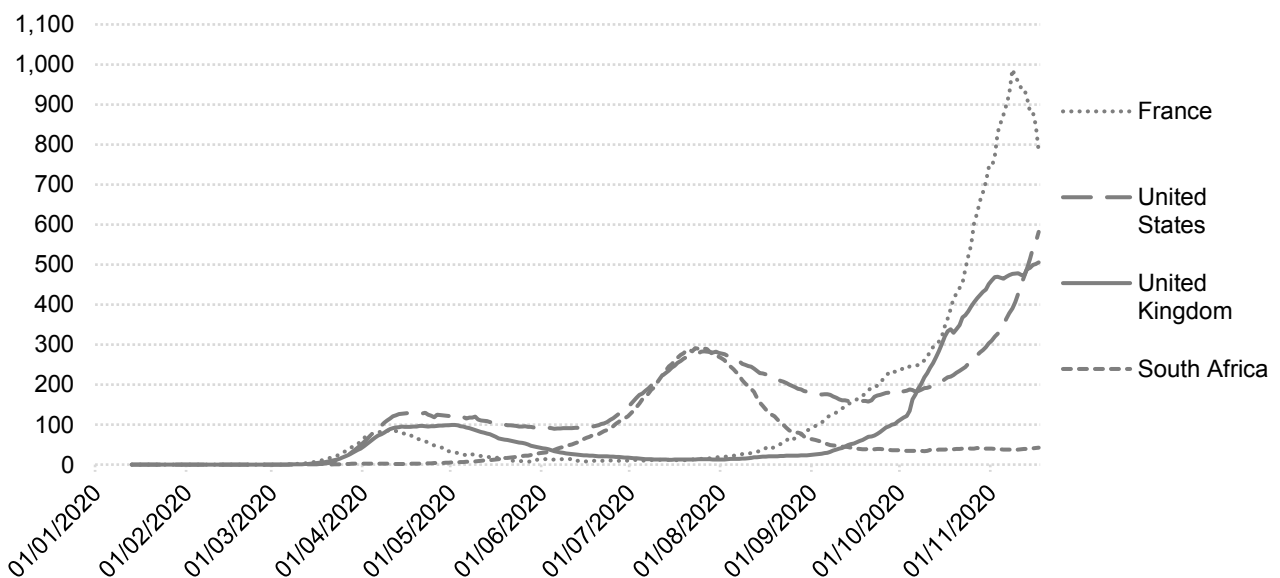

- GOLD:** No reported cases in last 14 days and exempt from UK quarantine
- GREEN:** 14-day reported cumulative case prevalence higher than zero but less than the medium threshold (0.04%) and exempt from UK quarantine
- AMBER:** 14-day reported cumulative case prevalence above the medium threshold (0.04%) but less than the high threshold (0.10%) or countries who are below the medium threshold but not exempt from UK quarantine
- RED:** All countries with 14-day reported cumulative case prevalence above the high threshold (0.10%)
- Not classified:** Countries not exempt from UK quarantine but with no reported cases, and countries whose data are not reported by ECDC

### Classification changes since the last update on November 10, 2020:

Peru, Oman, Iceland	Red	to →	Amber
Greenland	Gold	to →	Green
Botswana, Maldives	Amber	to →	Red

\* Note: During 10-17 November two cases have been reported on the Falkland Islands and one case on Ascension. However these were identified during mandatory arrival quarantine procedures, and so their community case prevalence rates remains zero and their classification remains 'Gold'.

### 14-day reported case prevalence rates per 100,000 population, selected countries:

This Update is produced by the St Helena Statistics Office. For full details of the methodology and data sources, please see <https://www.sainthelena.gov.sh/stats-bulletin-8-covid-19>.

Country	Population	14-day case prevalence, per 100,000	Classification (* would be classed at lower risk level if UK quarantine restrictions were lifted)
Anguilla	14,872	0.0	Gold
Ascension	806	0.0	Gold
British Virgin Islands	30,033	0.0	Gold
Brunei	433,296	0.0	Gold
Falkland Islands	3,372	0.0	Gold
Montserrat	4,991	0.0	Gold
St Helena	4,577	0.0	Gold
