

Press Release

Public Consultation Meeting

Development Proposal for Satellite Earth Stations at Horse Point

The Planning Service has received the development application for the development of 19 Satellite Earth Stations and Control Building at Horse Point and is now seeking the views of the communities and businesses and all other interested parties. This is now a formal stage of the development process to assist with the assessment and its potential impact.

There will be two public meetings:

On Thursday 4th November 2021, at 7PM

At the Harford Community Centre, Longwood

And

On Tuesday 9th November 2021, at 7PM

At the Jamestown Community Centre

In the preparation of the proposals and Environmental Impact Assessment Report, Government Officer acting on behalf of the Applicant have held a number of public and stakeholder consultation meetings and walkabout to seek the view of the interested groups and the wider community. The view expressed at these meetings have been incorporated in the design proposal and report. The consultation meetings are now your opportunity to view the details of the proposal and to let the Land Development Control Authority know of your concerns and support for the proposal.

The Planning Officers will explain the details of the scheme and this will also be your opportunity to view the plans and supporting documentation and seek explanation.

To enable the wider community to express their views on the proposed development following the public consultation meeting, the closing date for consultation will be:

4.00PM on Friday 19th November 2021.
