

BOOK OF THE WEEK

Since early 2020, the world has experienced a series of catastrophic events, a global pandemic caused by what appears to be an engineered coronavirus; international lockdowns and border closings, such as the most recent one caused by the Omicron variant, causing widespread business closures, economic collapse, and massive unemployment; and an unprecedented curtailment of civil liberties and freedoms in the name of keeping people safe by locking them up in their homes.

We are now living in a world that is increasingly ruled, not by our democratic systems and institutions, but by public health fiat, carried out by politicians who rule by instilling fear and panic.

The good news in all of this is that we *can* take control of our health and that, together, we have the power to unite and fight back for our health, democracy, and freedom. The time is now for a global awakening. As Dr. Mercola and Cummins remind us, this is the fight of our lives.
